

I have uploaded a PDF containing the finalized content for the **Business Documentation Agent**.

IMPORTANT:

This update should apply **ONLY to the agent card currently named "Appointment Booking"**.

The underlying functionality represented by this card is actually a **Business Documentation Agent**, and the content, naming, and descriptions should be updated accordingly.

Required Renaming

Replace all references to:

- Appointment Booking
- Appointment Booking Agent
- Appointment Scheduler
- Appointment Assistant

with:

Business Documentation Agent

This rename should be reflected consistently across:

- Agent Detail Page
- Agent Library/Homepage Card
- Agent Name
- Agent ID Display
- Hero Section
- Navigation References (if applicable)
- Search/Filter Metadata (if applicable)
- Any content or configuration files that define the displayed agent name

Do not modify any other agent cards or agent names.

Your Task

1. Read the uploaded PDF completely and extract all content.
2. Locate the existing **Appointment Booking** agent configuration and detail page.
3. Rename this agent to **Business Documentation Agent**.
4. Replace all placeholder or dummy content with the content from the PDF.

5. Preserve the existing UI design, layout, styling, spacing, typography, icons, animations, and component structure.
 6. Update only content-related fields.
-

Map the PDF content to the following sections

- Agent Name
 - Agent ID
 - Hero Tagline
 - Overview
 - System Requirements
 - Operational Protocol
 - How It Works
 - Expected Output
 - Output Samples
 - Agent Card Description
 - Agent Tags
 - Sidebar Requirements List
-

Requirements

- Do not rewrite, summarize, or paraphrase the PDF content.
 - Use the content exactly as provided in the PDF.
 - Do not create new sections.
 - Do not create new UI components.
 - Do not modify functionality, document generation workflows, integrations, AI logic, or automations.
 - Do not change routing, navigation, styling, animations, or page structure.
 - Maintain existing formatting for paragraphs, bullet points, lists, sample outputs, and code blocks.
 - If content is stored in JSON, TypeScript, JavaScript, React components, configuration files, or data files, update the appropriate source files accordingly.
 - Ensure the homepage Agent Card content matches the detailed agent page content.
-

CRITICAL SCOPE LIMITATION

- Modify ONLY the card currently named **Appointment Booking**.
- Rename that card to **Business Documentation Agent**.
- Do NOT update the AI Resume Screening Agent.

- Do NOT update the Expense Intelligence Agent.
 - Do NOT update the Task Companion Agent.
 - Do NOT update the Help Desk Agent.
 - Do NOT update the Campus Concierge Agent.
 - Do NOT update the Hospital Receptionist Agent.
 - Do NOT update the LinkedIn Thought Leadership Agent.
 - Do NOT modify any shared templates unless the change affects only the Business Documentation Agent content.
 - Do NOT alter any other cards displayed on the AgentHub homepage.
-

After Completion

1. Provide a list of all modified files.
2. Explain what was updated in each file.
3. Confirm that only the former **Appointment Booking** agent was modified.
4. Verify that no other agent content, functionality, workflow, automation, or UI was changed.
5. Confirm that the card now displays **Business Documentation Agent** everywhere in the application.
6. Confirm that all Appointment Booking content has been fully replaced with Business Documentation Agent content.
